RE: Price Query, Reference ODIN24441

Dear Lin,

Emperor Energy Limited (“EMP”) refers to your letter this morning and provides the following response to your queries:

1. Is EMP aware of any information concerning it that has not been announced to the market which, if known by some in the market, could explain the recent trading in its securities?

No.

2. If the answer to question 1 is “yes”.

(a) Is EMP relying on Listing Rule 3.1A not to announce that information under Listing Rule 3.1? Please note that the recent trading in EMP’s securities would suggest to ASX that such information may have ceased to be confidential and therefore EMP may no longer be able to rely on Listing Rule 3.1A. Accordingly, if the answer to this question is “yes”, you need to contact us immediately to discuss the situation.

(b) Can an announcement be made immediately? Please note, if the answer to this question is “no”, you need to contact us immediately to discuss requesting a trading halt (see below).

(c) If an announcement cannot be made immediately, why not and when is it expected that an announcement will be made?

Not Applicable

EMPEROR ENERGY
L I M I T E D

3. If the answer to question 1 is “no”, is there any other explanation that EMP may have for the recent trading in its securities?

On Monday 14th September the Australian Government through Prime Minister Scott Morrison announced that it would back the development of a gas fired power station at Kurri Kurri in the Hunter Valley to replace the dispatchable energy that will be lost in 2023 when Liddell Power Station, also located in the Hunter Valley, closes.

The Kurri Kurri site was previously used as an Aluminium Smelter and as a result has substantial capacity into the NSW electricity grid.

The Australian Government is giving the private sector 7 months, until the end of April 2020, to make commitments to delivering 1000MW of dispatchable energy by the summer of 2023-24.

If this commitment is not made the Australian Government is indicating it will back the Australian Government owned Snowy Hydro will develop the Kurri Kurri site.

Emperor Energy considers the market has responded to this information as a clear indication that gas is an essential part of Australian East Coast electricity generation moving forward.

Emperor Energy is progressing forward with its Judith Gas Field project in the Offshore Gippsland Basin, Victoria and considers that the market recognises that this project could potentially become a significant new source of gas in the East Coast gas market.

4. Please confirm that EMP is complying with the Listing Rules and, in particular, Listing Rule 3.1.

We confirm EMP is comply with the all Listing Rules including Listing Rule 3.1.

5. Please confirm that EMP’s responses to the questions above have been authorised and approved under its published continuous disclosure policy or otherwise by its board or an officer of EMP with delegated authority from the board to response to the ASX disclosure matters.

This announcement has been authorised for release by the board of directors.

Yours faithfully
